

## Dataset S1

### Column descriptions ###

# #

# 1. Serial:

# 2. Accession: Genome accession number.

# 3. Organism: Name of organism.

# 4. Lineage: Taxonomic classification of the organism.

# 5. ProteinId: Protein Identifier for this protein in the genome.

# 6. First60AminoAcids: First 60 amino acids of the protein.

# 7. Product: Annotated product for the protein.

# 8. TMHMMOutput: Output produced by TMHMM version 2.0. TMHMM produced

# multi-line output. In this column the lines in TMHMM output have been

# separated by the string "\n". Note that these are two characters not

# the single newline character programmers are used to.
